GridLight™ for Sports Light

Remote management for sports light

amplex

GridLight™ - Intelligent Sports Light Solution

Amplex References

Amplex has been controlling street and sports lights since 2001 and have references all over the world in all kind of environmental conditions.

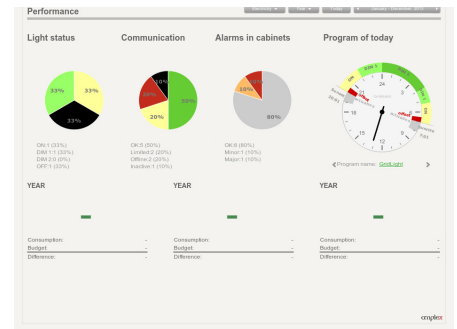

GridLight™ is by far the most used streetlight management system controlling millions of fixtures in 19 countries. City and even country wide installations have been applied controlling up to 275.000 fixtures in a single project. Implemented in Abu Dhabi, Copenhagen, Madrid, Johannesburg, Göteborg, Beijing, National Road Authorities in Denmark, etc.

Intelligent Sports Light Management

Amplex GridLight™ is the intelligent, automated management system that delivers the most advanced easy to use solution for sports light – driving down your energy and maintenance costs. It is the clear choice for the energy conscious sports facility. GridLight™ minimizes the expense and hassle of visiting each facility to turn lights on or off, as well as reduces energy wasted from powering lights when a facility isn't in use. Just text our solution to turn the light on and off. It's that easy.

The advantages of the platform include:

- Central sports light control – for improved accuracy, system visibility and operational efficiency
- Remote control of light using text messages, web or our smart phone app
- Power quality monitoring – identify and prevent problems and failures
- Easy to use to manage lights on parking lots, paths and streets
- Multiple zone capability with independent or group zone control
- Intelligence for better management – full burn hour reports and fault monitoring: Power failures, bulb errors, voltage variations, etc.
- Advanced programming including automatic sunrise/sunset calculations, photocell input, weekend and holiday programming and multiple dimming level programs
- Energy management built in - alarms you if you overspend and make you benchmark your installations
- Fast deployment - retrofits in most installations
- Proven – in numerous deployments, powering several million street and sports lights worldwide, every night
- GridLight™ is a complete turn-key solution that is field-proven and backed by our precise, proven deployment methodology.

GridLight™ Performance View gives you Key Performance Indicators (KPI) that easily provide the basic knowledge needed to manage a large number of sports lights.

GridTool™ - The ultimate field tool for GridLight™
